

Printer Error Checklist

Use this sheet before removing drivers or resetting hardware.

- Write down the exact code before restarting.
- Check paper tray, rear door, duplex path, and small torn scraps.
- Check ink, toner, drum, and cartridge seating.
- Cancel stuck jobs from the print queue.
- Confirm the correct default printer.
- Restart the Print Spooler service if Windows still shows an error.
- Send one plain test page after each change.
